

On the path to a sustainable future

We know that you want to protect our Planet and its People.

So do we. As a hospitality unit, we've committed to a collective vision towards more sustainability in hospitality and we want to create real change by driving demand for more responsible travel. That's why we are developing a Sustainability program that ensures sustainable stays that make a real difference for Planet and People.

The Travel & Tourism sector is taking important steps towards greater sustainability and net-zero operations. To reach this vision, the World Travel & Tourism Council (WTTC), together with leading hotel groups and destination authorities have worked hand in hand to identify the first crucial sustainable steps that all properties around the world, whatever their size, can and should take and thereby raise the bar of sustainability in Travel & Tourism overall. We can truly say that Hotel Sustainability Basics is a globally recognized set of sustainability indicators for hotels, developed by the industry for the industry.

Mirabilis Boutique Hotel adopted this framework and we have committed to net-zero by 2050 and set our emission reduction targets based on climate science. To reach this ambitious mid-term decarbonization target, Mirabilis Boutique Hotel has set intermediate targets. The implementation of the Hotel Sustainability Basics in our hotels is the main way to approach sustainability. The following infographic summarizes our targets and actions.

What are the Mirabilis Sustainability Basics?

Efficiency

Robust approaches to measuring and reducing energy and water consumption, waste and carbon emissions.

1. Measure and reduce energy use
2. Measure and reduce water use
3. Identify and reduce waste
4. Measure and reduce carbon emissions

How are the Sustainability Basics implemented in our hotels?

Efficiency

We are committed to measuring and reducing energy and water consumption, waste and carbon emissions by:

Improving the **energy efficiency** of our buildings and controlling the water consumption helps us to reduce the ecological footprint of our hotel. One of the concrete steps we took are the installation of **solar panels** on the roof of the building for **renewable energy supply** and the selection of energy efficient equipment.

Mirabilis Boutique Hotel has set a target of **reducing its carbon emissions by 30% by 2035**. CO₂ emissions are continuously monitored by the certified platform Ecohotel.

We promote better **waste management** by sorting waste, eliminating single-use plastics and reducing food waste.

Planet

Fundamental actions to protect the environment

5. Linen reuse program
6. Green cleaning products
7. Vegetarian options
8. No single-use plastic straws and stirrers
9. Replace single-use plastic water bottles
10. Replace single-use plastic mini toiletry bottles

Planet

Our commitment to the planet with positive impact:

Eliminating cleaning products that are harmful to both the soil and our team members. Our hotel uses eco-labelled cleaning products.

As part of our rich F&B offering, we aim to offer vegetarian choices in every menu. A vegetarian meal typically has half the footprint of a meat-based choice

We intend to introduce bulk amenity dispensers in Mirabilis from 2025. This will remove over 20.000 miniature amenities from circulation annually, eliminating the use of almost 1 ton of plastic each year.

People

Fundamental actions for a positive contribution to the communities in which hotels are located

11. Community benefit
12. Reduce Inequalities

Planet

We are keen to contribute to a better integration of our activities in the community and to a greater awareness of social aspects and societal developments:

85% of all suppliers are local

Continuous education of the staff with many e-learning training hours

Over 50% women in Mirabilis staff

*We need you by our side
Be a Green Guest:
Saving Energy and Water Together*

Dear Esteemed Guests,

Welcome to our hotel! We value your presence and aim to make your stay comfortable while also being mindful of our environment. Join us in our efforts to conserve energy and reduce our carbon footprint. Here are some simple yet effective tips to help you contribute to our green initiative:

1. Lights Out, Savings On: When leaving your room, please remember to switch off all lights, including bathroom lights and bedside lamps. Natural light is beautiful and free, so let it brighten your room during the day.

2. Unplug Unused Devices: Chargers, laptops, and other electronic devices continue to draw power even when not in use. Unplug them when they're not needed to save energy.

3. Adjust the Thermostat: Be mindful of the thermostat settings in your room. During colder months, lowering the thermostat by just a few degrees can make a significant difference in energy consumption. In warmer months, raising the temperature slightly can also help conserve energy.

4. Close Windows and Curtains: Keeping windows closed when using heating or air conditioning systems helps maintain the desired temperature in your room, reducing energy waste. Drawing curtains or blinds during hot sunny days can also help keep your room cooler.

5. Use Energy-Efficient Amenities: Our hotel is equipped with energy-efficient appliances and amenities. Make use of these resources consciously, knowing that they are designed to minimize energy consumption without compromising your comfort.

6. Conserve Water: Every drop counts! Please use water wisely during your stay. Take shorter showers and turn off the tap while brushing your teeth or shaving. Reusing towels and linens also helps conserve water and energy used in laundering.

7. Recycle and Reduce Waste: Help us keep our environment clean by sorting your waste properly. Utilize recycling bins provided in your room for paper, plastic, and glass items. Minimize single-use plastics by using refillable water bottles and avoiding disposable items whenever possible.

By following these simple tips, you not only contribute to our green efforts but also help preserve our planet for future generations. Thank you for being a responsible and eco-conscious guest.

Enjoy your stay !
